The following are significant items or events that occurred in the third quarter of 2022.

Provisions for Credit Losses

Provision for credit losses in the third quarter of 2022 was \$208 million, compared with \$138 million in the year-ago quarter. During the third quarter of 2022, the provision for credit losses was impacted by new loan commitments, net of expired commitments, which contributed \$163 million to the provision, and slower than expected prepayment speeds that contributed \$57 million, which were offset by the negative \$50 million provision associated with our \$1.0 billion private education loan sale completed during the quarter. The remaining changes were driven by changes in the economic outlook and the adjustments to management overlays. In the year-ago quarter, the provision for credit losses was affected by provisions for new loan commitments and an increase in provision related to the company's implementation of new credit administration practices in 2021.

Progress on Balance Sheet and Capital Allocation

Disposition of Credit Card Business

The company plans to exit and sell its credit card business to focus resources on its core business strategies. The company will process completed credit card applications received by Dec. 31, 2022. At Sept. 30, 2022, the company held \$29 million of credit card loans held-for-sale.

Share Repurchases

In the third quarter of 2022, the company repurchased 1 million shares of its common stock at a total cost of \$17 million, or an average purchase price of \$14.14 per share, under a Rule 10b5-1 trading plan authorized under its share repurchase programs.

From Jan. 1, 2020 through Sept. 30, 2022, the company has repurchased 177 million shares of common stock under its repurchase programs, which represents a 42% reduction in the total number of shares outstanding on Jan. 1, 2020. The company repurchased 31 million shares in the nine months ended Sept. 30, 2022, at an average purchase price of \$18.00 per share, which is an 11% decrease in shares outstanding since the beginning of 2022. At Sept. 30, 2022, there was \$736 million of capacity remaining under the 2022 Share Repurchase Program, which was announced on Jan. 26, 2022 and expires on Jan. 25, 2024.

Repurchases may occur under the company's share repurchase programs from time to time and through a variety of methods, including tender offers, open market repurchases, repurchases effected through Rule 10b5-1 trading plans, negotiated block purchases, accelerated share repurchase programs, or other similar transactions. The timing and volume of any repurchases will be subject to market conditions, and there can be no guarantee that the company will repurchase up to the limit of its share repurchase programs or at all.

The following provides guidance on the company's performance in 2022.

Guidance*

For 2022, the company expects the following:

- Full-year diluted non-GAAP "Core Earnings" per common share of \$2.50 - \$2.60.**
- Full-year Private Education Loan originations year-over-year growth of 9% - 11%.
- Full-year total loan portfolio net charge-offs of \$325 million - \$345 million.
- Full-year non-interest expenses of \$555 million - \$565 million.

* See page 6 for a cautionary note regarding forward-looking statements.

** See Non-GAAP "Core Earnings" to GAAP Reconciliation on page 9 for a description of non-GAAP "Core Earnings". GAAP net income attributable to SLM Corporation common stock is the most directly comparable GAAP measure. However, this GAAP measure is not accessible on a forward-looking basis because the company is unable to estimate the net impact of derivative accounting and the associated net tax expense (benefit) for future periods.

Footnotes:

(1) Sallie Mae provides non-GAAP "Core Earnings" because it is one of several measures management uses to evaluate management performance and allocate corporate resources. The difference between non-GAAP "Core Earnings" and GAAP net income is driven by mark-to-fair value unrealized gains and losses on derivative contracts recognized in GAAP, but not in non-GAAP "Core Earnings" results. See the Non-GAAP "Core Earnings" to GAAP Reconciliation in this press release for a full reconciliation of GAAP and non-GAAP "Core Earnings." Non-GAAP "Core Earnings" exclude periodic unrealized gains and losses caused by the mark-to-fair value valuations on derivatives that do not qualify for hedge accounting treatment under GAAP, but include current period accruals on the derivative instruments. Under GAAP, for our derivatives held to maturity, the cumulative net unrealized gain or loss over the life of the contract will be equal to \$0. Management believes the company's derivatives are effective economic hedges, and, as such, they are a critical element of the company's interest rate risk management strategy. Our non-GAAP "Core Earnings" are not defined terms within GAAP and may not be comparable to similarly titled measures reported by other companies.

(2) We calculate and report our Return on Assets ("ROA") as the ratio of (a) GAAP net income numerator (annualized) to (b) the GAAP total average assets denominator.

(3) We calculate and report our non-GAAP "Core Earnings" Return on Assets ("Non-GAAP Core Earnings ROA") as the ratio of (a) non-GAAP "Core Earnings" net income numerator (annualized) to (b) the GAAP total average assets denominator.

(4) We calculate and report our Return on Common Equity ("ROCE") as the ratio of (a) GAAP net income attributable to common stock numerator (annualized) to (b) the net denominator, which consists of GAAP total average equity less total average preferred stock.

(5) We calculate and report our non-GAAP "Core Earnings" Return on Common Equity ("Non-GAAP Core Earnings ROCE") as the ratio of (a) non-GAAP "Core Earnings" net income attributable to common stock numerator (annualized) to (b) the net denominator, which consists of GAAP total average equity less total average preferred stock.

(1) Derivative Accounting: Non-GAAP “Core Earnings” exclude periodic unrealized gains and losses caused by the mark-to-fair value valuations on derivatives that do not qualify for hedge accounting treatment under GAAP, but include current period accruals on the derivative instruments. Under GAAP, for our derivatives held to maturity, the cumulative net unrealized gain or loss over the life of the contract will equal \$0.

(2) Non-GAAP “Core Earnings” tax rate is based on the effective tax rate at Sallie Mae Bank where the derivative instruments are held.

The following table reflects our provisions for credit losses and total portfolio net charge-offs:

| (Dollars in thousands) | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---------------------------------|-------------------------------------|------------|------------------------------------|-------------|
| | 2022 | 2021 | 2022 | 2021 |

| Total portfolio net charge-offs | (100,157) | (48,920) | (272,209) | (139,582) |

We evaluate management’s performance internally using a measure that starts with non-GAAP “Core Earnings” net income as disclosed above for a period, and further adjusting it by increasing it by the impact of GAAP provisions for credit losses, and decreasing it by the total portfolio net charge-offs recorded in that period, net of the tax impact of these adjustments.
